Mobilizing Inclusion Lisa Garcia Bedolla 2012-10-09 Which get-out-the-vote efforts actually succeed in ethnoracial communities—and why?

Analyzing the results from hundreds of original experiments, the authors of this book offer a persuasive new theory to explain why some methods work while others don't. Exploring and comparing a wide variety of efforts targeting ethnoracial voters, Lisa García Bedolla and Melissa R. Michelson present a new theoretical frame—the Social Cognition Model of voting, based on an individual's sense of civic identity—for understanding get-out-the-vote effectiveness. Their book will serve as a useful guide for political practitioners, for it offers concrete strategies to employ in developing future mobilization efforts.

Language Teaching and Learning Debita Tan Ai Lin 2014-06-19 In every discussion on the role that language plays in our lives, every orator – from prominent politicians and corporate figures to linguists, educational experts, and others – concedes that language is important in all spheres of life. Language is both personal and introspective, as well as public and

communal. Without it, we would not be able to communicate and articulate our thoughts and feelings to ourselves, to those in our inner circles, and to those in the world at large. Without it, we would not be able to establish partnerships and collaborations, and to unite peoples of diverse backgrounds and intrinsic values. Without it, too, we would not be able to learn new discoveries and gain new knowledge. The nurturing of a language learning culture is of the utmost importance to ensure that language teaching and learning supports the development of individuals, societies, nations, and populations. Language researchers, educators, and practitioners need to ensure that their learners are empowered to remain relevant. They need to produce critical and analytical thinkers, and successful language users in listening, speaking, reading, and writing. The collection of chapters in this volume addresses language teaching and learning dilemmas and draws attention to the challenges researchers have overcome and those they continue to face. The book chapters here reflect the transcendence by language teaching and learning of ordinary boundaries, especially with the advent of the digital revolution, and provide new perspectives, pedagogies, and approaches that help shape ethical, responsible, and sustainable policies. Readers of this volume, whether language practitioners, students, researchers, policy- and decision-makers, concerned educationists, or any interested individual, will gain new insights and experiences as they explore new identities, new instructional media for interactive teaching and learning and new modes

of meaning in diverse local and global contexts.

Stereotypes and Language Learning Motivation Larisa Nikitina 2020-04-28 This book explores stereotypes that learners of six Asian languages—

Japanese, Mandarin, Korean, Myanmar, Thai and Vietnamese—hold about the target language country, its cultures and people. Some of the findings, such as the language learners' mental images of Myanmar, Thailand and Vietnam, are presented here for the first time. Recognizing that stereotypes, and attitudes embedded in them, have an impact on people's actions and behavioural intentions, this book examines whether and how the country stereotypes held by the students influenced their motivation to learn the target language. Besides providing worthwhile insights into the content and structure of the country stereotypes and their relationship with language learning motivation, this book offers methodological and theoretical advancements. Drawing on intellectual heritage of Russian psychologist Lev Vygotsky (1896-1934) the book highlights how the concepts of word meaning (znachenie slova) and word sense (smysl) could be fruitfully employed in studies on stereotypes that people learning a foreign language hold about a target language country. This book will appeal to all readers interested in stereotypes that people have about foreign countries and also to educators and researchers who study language learning motivation.

Moonlight Secrets R.L. Stine 2013-10-29 When you can't sleep, there's always NIGHTS. It all started with Lewis and Jamie. They were sneaking out late at night to be together. Then their friends started joining in. First at the old burned-down Fear Mansion. Later at the local bar Nights. They called themselves the Night People. And they carefully protected their secret world. No parents, no work, no stress. Just chilling with friends in their own private after-hours club. But then the nights turned dark. Unexplainable accidents, evil pranks...and then, later, the killings. The Night People know they have to stop the horror all by themselves, or else they risk exposure -- not to mention their lives. Things go bump in the Night....

1968 in America Charles Kaiser 2012-11-27 From assassinations to student riots, this is "a splendidly evocative account of a historic year—a year of tumult, of trauma, and of tragedy" (Arthur Schlesinger Jr.). In the United States, the 1960s were a period of unprecedented change and upheaval—but the year 1968 in particular stands out as a dramatic turning point. Americans witnessed the Tet offensive in Vietnam; the shocking assassinations of Martin Luther King Jr. and Robert Kennedy; and the chaos at the Democratic National Convention in Chicago. At the same time, a young generation was questioning authority like never before—and popular culture, especially music, was being revolutionized.

Largely based on unpublished interviews and documents—including in-depth conversations with Eugene McCarthy and Bob Dylan, among many others, and the late Theodore White’s archives, to which the author had sole access—1968 in America is a fascinating social history, and the definitive study of a year when nothing could be taken for granted.

“Kaiser aims to convey not only what happened during the period but what it felt like at the time. Affecting touches bring back powerful memories, including strong accounts of the impact of the Tet offensive and of the frenzy aroused by Bobby Kennedy’s race for the presidency.”
