Academic E-Books Suzanne M. Ward 2015-11-15 E-Books in Academic Libraries: Stepping Up to the Challenge provides readers with a view of the changing and emerging roles of electronic books in higher education. The three main sections contain contributions by experts in the publisher/vendor arena, as well as by librarians who report on both the challenges of offering and managing e-books and on the issues surrounding patron use of e-books. The case study section offers perspectives from seven different sizes and types of libraries whose librarians describe innovative and thought-provoking projects involving e-books. Read about perspectives on e-books from organizations as diverse as a commercial publisher and an association press. Learn about the viewpoint of a jobber. Find out about the e-book challenges facing librarians, such as the quest to control costs in the patron-driven acquisitions (PDA) model, how to solve the dilemma of resource sharing with e-books, and how to manage PDA in the consortial environment. See what patron use of e-books reveals about

reading habits and disciplinary differences. Finally, in the case study section, discover how to promote scholarly e-books, how to manage an e-reader checkout program, and how one library replaced most of its print collection with e-books. These and other examples illustrate how innovative librarians use e-books to enhance users' experiences with scholarly works.

Handbook of Surface and Interface Analysis John C. Riviere 2009-06-24 The original Handbook of Surface and Interface Analysis: Methods for Problem-Solving was based on the authors' firm belief that characterization and analysis of surfaces should be conducted in the context of problem solving and not be based on the capabilities of any individual technique. Now, a decade later, trends in science and technology appear

Organization Theory and Design Jonathan Murphy 2014 Organizing involves continous challenges in the face of uncertainty and change. How is globalization impacting organizations? How will new strategies for a turbulent world affect organizational design? In this second edition of Organization Theory and Design, developed for students in the UK, Europe, the Middle East and Africa, respected academics Jonathan Murphy and Hugh Willmott continue to add an international perspective to Richard L. Daft's

landmark text. Together they tackle these questions in a comprehensive, clear and accessible study of the subject. *Handbook of Technical Writing* Charles T. Brusaw 1997-08-15 New to this edition: Up-to-date information on on-line research and computer resources. A unique four-way access system enables users of the Handbook of Technical Writing to find what they need quickly and get on with the job of writing: 1. The hundreds of entries in the body of the Handbook are alphabetically arranged, so you can flip right to the topic at hand. Words and phrases in bold type provide cross-references to related entries. 2. The topical key groups alphabetical entries and page numbers under broader topic categories. This topical table of contents allows you to check broader subject areas for the specific topic you need. 3. The checklist of the writing process summarizes the opening essay on "Five Steps to Successful Writing" in checklist form with page references to related topics, making it easy to use the Handbook as a writing text. 4. The comprehensive index provides an exhaustive listing of related and commonly confused topics, so you can easily locate information even when you don't know the exact term you're looking for.

Laparoscopic Colorectal Surgery Jeffrey W. Milsom 2013-03-09

Laparoscopic Colorectal Surgery provides an authoritative, team-oriented approach to the latest state-of-the-art laparoscopic colorectal procedures and surgical techniques. Written by pioneers in the field, this text will supply surgeons with all the information necessary to accomplish advanced laparoscopic procedures. Comprehensive discussions of positioning, instrumentation, cannulas, surgical techniques, special considerations, and considerations in cancer surgery are featured for a wide variety of major operative procedures, including - smallbowel resection - abdominoperineal resection - ileocelectomy, right colectomy, and total abdominal colectomy - proctosigmoidectomy - stoma construction and closure using laparoscopic techniques.

Breast Tumours Who Classification of Tumours Editorial Board 2019-12-03 ****When not purchasing directly from the official sales agents of the WHO, especially at online bookshops, please note that there have been issues with counterfeited copies. Buy only from known sellers and if there are quality issues, please contact the seller for a refund.***** Breast Tumours is the second volume in the 5th edition of the WHO series on the classification of human tumors. This series (also known as the WHO Blue Books) is regarded as the gold standard for the diagnosis of tumors and comprises a unique synthesis of histopathological diagnosis with digital and molecular pathology. These authoritative and concise reference books provide indispensable international standards for anyone involved in the care of patients with cancer or in cancer research, underpinning individual patient treatment as well as research into all aspects of cancer causation, prevention, therapy, and education. This book will be of special interest to pathologists, oncologists, surgeons and epidemiologists who manage or research breast tumors. Sections are included on all recognized neoplasms of the breast including the nipple and areola. Since the previous edition there have been changes based on recent molecular and genetic information, with impact on clinical practice.

Polymer Films in Sensor Applications Gabor Harsanyi 2017-10-19 Polymer films now play an essential and growing role in sensors. Recent advances in polymer science and film preparation have made polymer films useful, practical and economical in a wide range of sensor designs and applications. Further, the continuing miniaturization of microelectronics favors the use of polymer thin films in sensors. This new book is the first comprehensive presentation of this technology. It covers both scientific fundamentals and practical engineering aspects. Included is an extensive survey of all types of sensors and applications. The very detailed table of contents in the next pages provides full information on content. More than 200 schematics

illustrate a wide variety of sensor structures and their function.

Workforce 2020 Richard W. Judy 1997 Ten years ago Hudson
Institute's landmark study *Workforce 2000* set the agenda for a
new understanding of workforce issues. Described by the New
York Times as "one of the most influential studies ever produced
by a think tank," this groundbreaking report set the terms for
much of the policy discussion at the government and corporate
levels on these issues. It was the first to call attention to the
changing demographics of the American workforce and the

growing gap between the skills likely to be required for entry-level
jobs in the future and those likely to be possessed by new entrants
into the labor force. Now Hudson releases its long-awaited follow-
up: *Workforce 2020*. Like its predecessor, the new book examines
the trends that shape the economy and workforce, and combines
them into a unique and fresh body of analysis. The authors set the
record straight on the demographic makeup of the workforce in
the years 2000 to 2020 and challenge the conventional wisdom on
trends affecting American workers and employers. Analyzing
important emerging issues, they detail the coming demographic
changes in the workforce--and their potentially serious effects on
the job market and the economy as a whole. The book also
considers the effects of globalization on U.S. business and the
American worker, the impact of rapid technological change, the
"skills gap" identified in the earlier report, and the need for a new
model of education, training, and employment services to prepare
workers for the jobs of the next century. *Workforce 2020* is an
indispensable guide to the next decade of workforce issues.

Fundamentals of Nanotechnology Gabor L. Hornyak
2018-12-14 WINNER 2009 CHOICE AWARD OUTSTANDING
ACADEMIC TITLE! Nanotechnology is no longer a subdiscipline of
chemistry, engineering, or any other field. It represents the
convergence of many fields, and therefore demands a new
paradigm for teaching. This textbook is for the next generation of
nanotechnologists. It surveys the field's broad landscape,
exploring the physical basics such as nanorheology, nanofluidics,
and nanomechanics as well as industrial concerns such as
manufacturing, reliability, and safety. The authors then explore
the vast range of nanomaterials and systematically outline devices
and applications in various industrial sectors. This color text is an
ideal companion to *Introduction to Nanoscience* by the same
group of esteemed authors. Both titles are also available as the
single volume *Introduction to Nanoscience and Nanotechnology*
Qualifying instructors who purchase either of these volumes (or

the combined set) are given online access to a wealth of instructional materials. These include detailed lecture notes, review summaries, slides, exercises, and more. The authors provide enough material for both one- and two-semester courses.

Strengthening China's and India's Trade and Investment Ties to the Middle East and North Africa 2009 China and India's spectacular economic rise over the last two decades has accelerated their trade and investment flows with the Middle East and North Africa (MENA), particularly with the oil-producing countries. And while these flows are still small, China and India's presence in the region is on the rise. This report focuses on the following questions: what have been evolution and the impact of MENA's trade and investment relations with China and India? what actions can be taken to maximize the benefits from these relations and to enhance MENA's international integration? The main findings indicate that the region as a whole has benefited from the rise of China and India in terms of better terms of trade, significant increases in oil and gas exports, and cheaper imports. However, producers of industrial goods have been negatively-and in a few cases severely-affected by competition with the two Asian countries in both third and domestic markets. While China and India are investing more in MENA, they are contributing very little to job creation or to the transfer and diffusion of technology. Faster growth in the two Asian countries-and the associated higher demand for energy-will increase revenues from oil and the difficult choices associated with their management. For the labor-abundant, non oil-producing countries, competition with China and India will increase. But the lack of competitive manufacturing industries and services, the insufficient attention given in the past to building technological capabilities and promoting openness and entrepreneurship are constraining their ability to respond to competition. They need to accelerate productivity to tackle unemployment, especially among youth. This may require the broader institutional changes seen in China and India-suggesting

the importance of a pragmatic reform agenda that can accelerate productivity, trade, and investment in the region.

The numbers cited after each entry are the SALUS numbers that were assigned to the documents when they appeared in the bibliography and can be used to look them up in the appropriate volume.

Financial Theory and Corporate Policy Thomas E. Copeland 2013-07-17 This classic textbook in the field, now completely revised and updated, provides a bridge between theory and practice. Appropriate for the second course in Finance for MBA students and the first course in Finance for doctoral students, the text prepares students for the complex world of modern financial scholarship and practice. It presents a unified treatment of finance combining theory, empirical evidence and applications.

Forensis Lawrence Abu Hamdan 2014 The role of material forensics in articulating new notions of the public truth of political struggle, violent conflict, and climate change are the focus of *Forensis*, the HKW exhibition catalog based on the theories of Eyal Weizman. - The concept of forensis was developed as a research project by Goldsmiths College, Centre for Research Architecture by theorist Eyal Weizman. The project is the subject of a major exhibition at the Haus der Kulturen der Welt (HKW) and catalog

cum theoretical reader presenting the findings and contributions of over 20 influential architects, artists, filmmakers, and academics. Forensis, (Latin for pertaining to the forum) argues for the role of material forensics as central to the interpretation of the ways in which states police and govern their subjects. Forensics engages struggles for justice across frontiers of contemporary conflict through the study of how technology mediates the testimony of material objects such as bones, ruins, toxic substances, etc. In the hopes of unlocking forensics potential as a political practice, the project participants present innovative investigations aimed at producing new kinds of evidence for use by international prosecutorial teams, political organizations, NGOs, and the UN.

Environmental Catalysis Vicki H. Grassian 2005-05-26 The study of environmental interfaces and environmental catalysis is central to finding more effective solutions to air pollution and in understanding of how pollution impacts the natural environment. Encompassing concepts, techniques, and methods, Environmental Catalysis provides a mix of theory, computation, analysis, and synthesis to support the latest applications in biocatalysis, green chemistry, environmental remediation and our understanding of the interaction of pollutants with natural systems. The book focuses on several aspects of environmental catalysis. Surface catalysis of airborne particles - including ice, trace atmospheric gases, aerosolized soot nanoparticles, and mineral dust surfaces - as well as particles in contact with ground water and their role in

surface adsorption, surface catalysis, hydrolysis, dissolution, precipitation, oxidation and ozone decomposition is explored. It continues by presenting catalysis as the key technology for treating emissions and reducing waste by-products. The authors review the theory behind catalytic converters and discuss the effectiveness of several catalysts, including zeolites and nanoparticles, in treating emissions, aromatic hydrocarbons, and chemical warfare agents. They also survey the use of biocatalysis in environmental remediation, and industrial processes, particularly in the production of transportation fuels, fine chemicals, and pharmaceuticals. Then the authors explain how enzymes can remove chlorinated organics and metals and how microbes can metabolize toxic chemicals from groundwater. Lastly, they discuss the principles of green chemistry, including the use of environmentally benign solvents, biphasic catalysts, and other alternative solvents to recover and recycle catalysts based on heavy metals. With increasing ground water pollution, increasing particulates in the atmosphere, and the increasing need to remove pollutants from industrial and automotive sources, Environmental Catalysis addresses issues that will be instrumental in current and future environmental challenges we face.

Photoacoustic Tomography Huabei Jiang 2018-09-03 The concept of photoacoustic tomography (PAT) emerged in the mid-1990s, and the field of PAT is now rapidly moving forward. Presenting the research of a well-respected pioneer and leading expert, Photoacoustic Tomography is a first-of-its-kind book covering the underlying principles and practical applications of PAT in a systematic manner. Written in a tutorial format, the text: Addresses the fundamentals of PAT, the theory on photoacoustic effect, image reconstruction methods, and instrumentation Details

advanced methods for quantitative PAT, which allow the recovery of tissue optical absorption coefficient and/or acoustic properties
Explores the development of several image-enhancing schemes, including both software and hardware approaches
Examines array-based PAT systems that are the foundation for the realization of 2-D, 3-D, and 4-D PAT
Discusses photoacoustic microscopy (PAM) and combinations of PAT/PAM with other imaging methods
Considers contrast-agents-based molecular PAT, with both nontargeted and cell receptor-targeted methods
Describes clinical applications and animal studies in breast cancer detection, osteoarthritis diagnosis, seizure localization, intravascular imaging, and image-guided cancer therapy
Photoacoustic Tomography is an essential reference for graduate students, researchers, industry professionals, and those who wish to enter this exciting field.

Multinational Enterprises and the Global Economy John H. Dunning 2008-01-01
For many years to come this volume. . . is surely going to be the ultimate reference work on international business. . . thanks to Dunning and Lundan, have at their disposal, a wealth of relevant data, as well as theoretical and empirical analyses, which will enable them to assess the capabilities, contributions and challenges posed by the multinational enterprises to the global economy. Seev Hirsch, *International Business Review*
Multinational Enterprises and the Global Economy has become a classic in international business. . . Yet , the book s second edition is even better than the first, in part because of Professor Dunning s wise decision to choose Dr Lundan as his co-author and to draw upon her deep knowledge of various strands of research on business government relations and the societal effects of firm behaviour. . . In addition to being a remarkably useful reference book, *Multinational Enterprises and the Global Economy* is the first book any IB doctoral student should read to understand the significance and richness of IB scholarship as it has developed over the past 50

years. Alain Verbeke, *Journal of International Business Studies*
The second edition of *Multinational Enterprises and the Global Economy* provides unparalleled coverage not only of the literature relevant to IB research but also of the evolution of IB in the world economy. Dunning and Lundan offer powerful insights into the societal effects of MNEs and the role of business government relations in the IB context. *Journal of International Business Studies*
This wonderful book offers the definitive synthesis of the modern literature on the economic aspects of international business. It is encyclopedic yet full of incisive insights. It is a creative masterpiece which unbundles the DNA of the multinational enterprise and shows how it is the cornerstone of the field of international business. Alan M. Rugman, University of Reading, UK
The rise of the multinational enterprise, and the consequent globalisation of the world economy, was arguably the single most important phenomenon of the second half of the twentieth century. This magisterial book, written by two leading authorities, examines this phenomenon in depth. It explains how foreign investment by multinationals diffused advanced technologies and novel management methods, driving productivity growth in Europe, Asia and North America; however, economic inequalities were reinforced as rich countries attracted more foreign investment than poor ones. This new edition of a classic work is not only an authoritative guide to contemporary multinational business, but a major historical resource for the future. Mark Casson, University of Reading, UK
This thoroughly updated and revised edition of a widely acclaimed, classic text will be required reading for academics, policymakers and advanced students of international business worldwide. Employing a distinctive and unified framework, this book draws together research across a range of academic fields to offer a synthesis of the determinants of MNE activity, and its effects on the economic and social well-being of developed and developing countries. Unique to the new edition is its focus on the institutional

underpinnings of the resources and capabilities of MNEs, and the role of MNE activity in transmitting and facilitating institutional change. Since the initial publication of this book more than a decade ago, the economic, managerial and social implications of globalisation and technological advancement have become even more varied and prominent. Accompanying these developments, there has been a rise in scholarly interest in interdisciplinary research addressing the important challenges of an ever-changing physical and human environment. Drawing on articles and books from international business and economics, as well as economic geography, political economy and strategic management, a systematic overview of the developments in scholarly thinking is presented

School to Career J. J. Littrell 2013-03-05 The 10th edition of *School to Career* builds on what made the previous editions so successful. Students explore careers using the career clusters and pathways framework; understand workplace expectations; develop career-readiness skills; and plan for life beyond graduation. *School to Career* provides students with the "how to" needed for preparing a résumé, searching for a job, taking on a work-based learning experience, exceeding employer expectations, managing personal finances, and funding postsecondary training and education. Case studies are used to examine challenges students may encounter in the world of work. • Communication, math, and technology skills are developed through activities and useful examples. • Each chapter provides insights on ethics and on using natural resources wisely. • Self-assessment opportunities help focus attention on the acquisition of key concepts.

To Be a Christian J. I. Packer 2020-01-07 Catechesis is an ancient practice of Christian disciple making that uses a simple question-and-answer format to instruct new believers and church members in the core beliefs of Christianity. To Be a Christian, by J. I. Packer and a team of other Anglican leaders, was written to renew this oft-forgotten tradition for today's Christians. With over 360 questions and answers, plus Scripture references to support each teaching, this catechism covers the full range of Christian doctrine and life, drawing from the Apostles' Creed, the Lord's Prayer, the

Ten Commandments, and other important doctrinal summaries. Clear, concise, and conversational, this resource was written for all believers who seek to be grounded more deeply in the truth of God's Word.

The Science and Technology of Industrial Water Treatment Zahid Amjad 2010-04-05 Mineral scale deposits, corrosion, suspended matter, and microbiological growth are factors that must be controlled in industrial water systems. Research on understanding the mechanisms of these problems has attracted considerable attention in the past three decades as has progress concerning water treatment additives to ameliorate these concerns.
